SUN VALLEY BRONZE EXPANDS VESSEL SINK COLLECTION

Summary:

Sun Valley Bronze has expanded its Vessel Sink Collection. Our new contemporary handcrafted sinks are available in both a stunning square bowl and a rectangular trough style for above counter applications. The silicon bronze used in this product (refer to photo) has been certified by Scientific Certification Systems (SCS) to contain a minimum 90% Pre-Consumer Recycled Bronze Content. Sinks are also available in white bronze, which has been certified to contain a minimum 95% Pre-Consumer Recycled Bronze Content. This product can be used to earn LEED MR Credits 4.1 and 4.2 for recycled content.

Bellevue, Idaho

April 20, 2009

Sun Valley Bronze is committed to creating the finest door, window, bath and cabinet hardware available, and each piece of solid bronze hardware is handcrafted and hand-finished in our Idaho foundry and studio. Sun Valley Bronze hardware is as beautiful on the inside as it is on the outside. We use nonferrous metals and Nylatron washers for durability, strength and a guarantee against rust. Our hardware is field reversible and field serviceable, allowing for repairs and changes to be made on-site. Sun Valley Bronze hardware is compatible with all types of components, mortise locks, latches and dead bolts. Since we control our own machine shop, as well as every other process of our manufacturing, we can machine specialty parts for custom applications.

Sun Valley Bronze has the capability to make nearly any custom hardware you envision for your project whether your style is contemporary, traditional or rustic. Using traditional drawing techniques and high tech 3-D software our artisans can recreate your original ideas.

Further information:

For more information about this collection, see the enclosed product cut sheet and photo CD. Visit our new web site at www.sunvalleybronze.com for complete information about our entire product line.

About Sun Valley Bronze:

Sun Valley Bronze has grown from its humble beginnings in Hailey, Idaho to a successful business that uses the latest in casting, machining and software technologies. Although the technology has advanced over time, the guiding philosophy of maintaining handcrafted quality lives on in the heart of this family owned and operated company.
